• What does an online class look like?
• Is the program entirely online, or will I be going to campus?
• How much time does the program take?
• How do I get started?
What is the Accelerated BSN Nursing Program at Northeastern?
What is the Accelerated BSN Nursing Program at Northeastern?

- Designed for those with a bachelor’s degree in another field to start a career in nursing
- Prepares for NCLEX exam / RN licensure
- Advanced nursing coursework will prepare you for a successful career in nursing

Courses combine theory classes, skills lab practice and clinical placements in real hospitals.

Theory and hands-on practice focus on sciences, nursing theory, research and advanced clinical concepts.
What is the Accelerated BSN Nursing Program at Northeastern?

At Northeastern, the Accelerated BSN program confers a Bachelor of Science in Nursing (BSN) after four semesters full time.

This means you can start pulling a salary as an RN 16 months after you start, once you’ve passed the NCLEX.
What is the Accelerated BSN Nursing Program at Northeastern?

Northeastern is a school on the move

- **2013:** Forbes ranks Northeastern a “Top College“:
  
  236 / 650 on the overall list
  
  167 in Private Colleges
  
  114 in Research Universities
  
  96 in the Northeast

- **2011:** U.S. Army Graduate Program in Anesthesia Nursing was ranked by the U.S. News and World Report as one of the “Best Graduate Nursing Anesthesia Programs“
What does an online class look like?
What does an online class look like?

• Online classes are an ideal way for busy adults to learn
• Same content as a traditional class, but with more flexibility
• Curriculum lives on a web-based platform that’s accessible anywhere with an Internet connection
• Learning modules and group discussions built into each class
• Assignment deadlines are met on your terms
• Online classes are reserved for theory (didactic) concepts
Online Classes

- Self-discipline is critical
- Web platform is the keeper of course content; student can access any piece of material at any time
- Listen and replay original lectures as often as needed
- Lectures and textbooks work together to explain course content
- Student learning is self-motivated and directed

Traditional Classes

- Physical attendance is critical
- Instructor is the keeper of course content; releases material a little at a time
- One chance to absorb material first-hand
- Live lecture is the primary method for content delivery; textbooks are supplementary
- Student learning can be affected by content delivery (instructor, environment)
• Course content can include:
  Audio lectures
  Assigned reading
  Videos
  Review questions
  Exercises

• Exercises may simulate real clinical case studies with you as the decision maker

• Other types of exercises include demonstrations and labeling/matching
Is the program entirely online, or will I be going to campus?
Is the program entirely online, or will I be going to campus?

• Online learning is just one component of the Accelerated BSN program

• Program comprises online theory classes, skills lab practice and clinical placements in real hospitals

• **Segments run concurrently so you can learn, practice and apply at the same time**

• Skills lab is based on Northeastern’s main campus in Boston

• Clinical placements occur onsite at hospitals and healthcare facilities in and around Boston
Skills Lab Practice

- Lab time on Boston campus is a main focus in the BSN program
- Skills lab operates like a nine-bed hospital wing
- Practice on mannikins that mimic any human function
- Learn from faculty and practice with your peers
- Acquire the skills you’ll be performing in your clinicals
Clinical Placements

- Observe and work with RNs and other medical pros during routine hospital shifts
- Provide hands-on care for real patients
- Receive exposure to different clinical units / medical specialties
- Gain other healthcare experience in settings such as community health and home care
- Clinical placements are within a 50-mile radius of Boston
How much time does the program take?
How much time does the program take?

• The program can be finished in 16 months (four semesters full time)

• Each semester includes online classes, skills lab and clinicals

• Credit hours for online classes and lab sessions vary per semester

• Locations for clinical placements change each semester

• Additional time commitments include proctored exams and academic advising at nursing site in Burlington
